# STEEL HISTORY

Steel is an Italian company with a long family heritage. Situated in Carpi near Bologna and founded in 1999, it is owned and run by the Po family, who are the third generation to be involved in the production of range cooking equipment. The original company was set up by Angelo Po in 1922 and his craftsmanship in stainless steel helped produce the first hand made stoves and later, the production of high quality appliances for restaurants.

Azienda familiare con sede a Carpi (Modena), nasce nel 1999 grazie all'intraprendenza dei fratelli Po che hanno saputo trasferire nel segmento delle cucine professionali l'esperienza e la notorietà del capostipite Angelo Po, autentico pioniere del settore, che avviò la sua attività di artigiano dell'acciaio nel 1922 con le prime cucine a legna, affermandosi poi nella produzione di avanzati modelli per la ristorazione. Oggi

La société italienne Steel est une entreprise avec une longue tradition industrielle de famille. Elle est située à Carpi, près de Bologne, fondée en 1999 et gérée par la famille Po, qui s'occupe de la production de cuisinières et fourneaux depuis trois générations. La maison fondée par Angelo Po en 1922 était spécialisée dans la production artisanale de poêles à bois et ensuite destinée à s'affirmer dans la fabrication industrielle d'équipements en acier inox

Die italienische Firma Steel hat eine lange Familientradition: in Carpi gelegen, wurde sie im Jahr 1999 gegründet, und sie wird von der dritten Generation der Familie Po geführt, die seit lange in der Industrie der Kochgeräte tätig ist. Das ursprüngliche Unternehmen war von Angelo Po in 1922 angefangen, das Sparherd und Heizofen als Handwerks produzierte, und dann entwickelte es sich als bewährter

Today Steel has come to the forefront of the manufacture of range cookers and hoods for the domestic market. Innovation and functionality are the byword for Steel's aesthetic designs and professional approach to kitchen products. As Steel has grown, so has the importance of their own brand names such as Genesi, Ascot and Sintesi and there is also a range of semi-professional barbecues and outdoor cooking equipment.

Steel si distingue anche con una vasta gamma di cucine in acciaio a marchio proprio estremamente innovative perché introducono funzionalità altamente professionali in ambito domestico. Tre le linee che uniscono design elegante ed altissime prestazioni: Genesi Ascot e Sintesi oltre ad una serie completa di barbecue semi-professionali.

pour les restaurants et pour l'hôtellerie. Aujourd'hui Steel s'impose pour son innovation et pour sa vaste gamme de fourneaux introduisant la fonctionnalité typiquement professionnelle dans le domaine de l'électroménager. Trois lignes de fourneaux, dont la marque Steel commence à se faire connaître, proposent un design raffiné et de très hautes performances: Genesi, Ascot, Sintesi ainsi que la série complète de barbecues semi-professionnels.

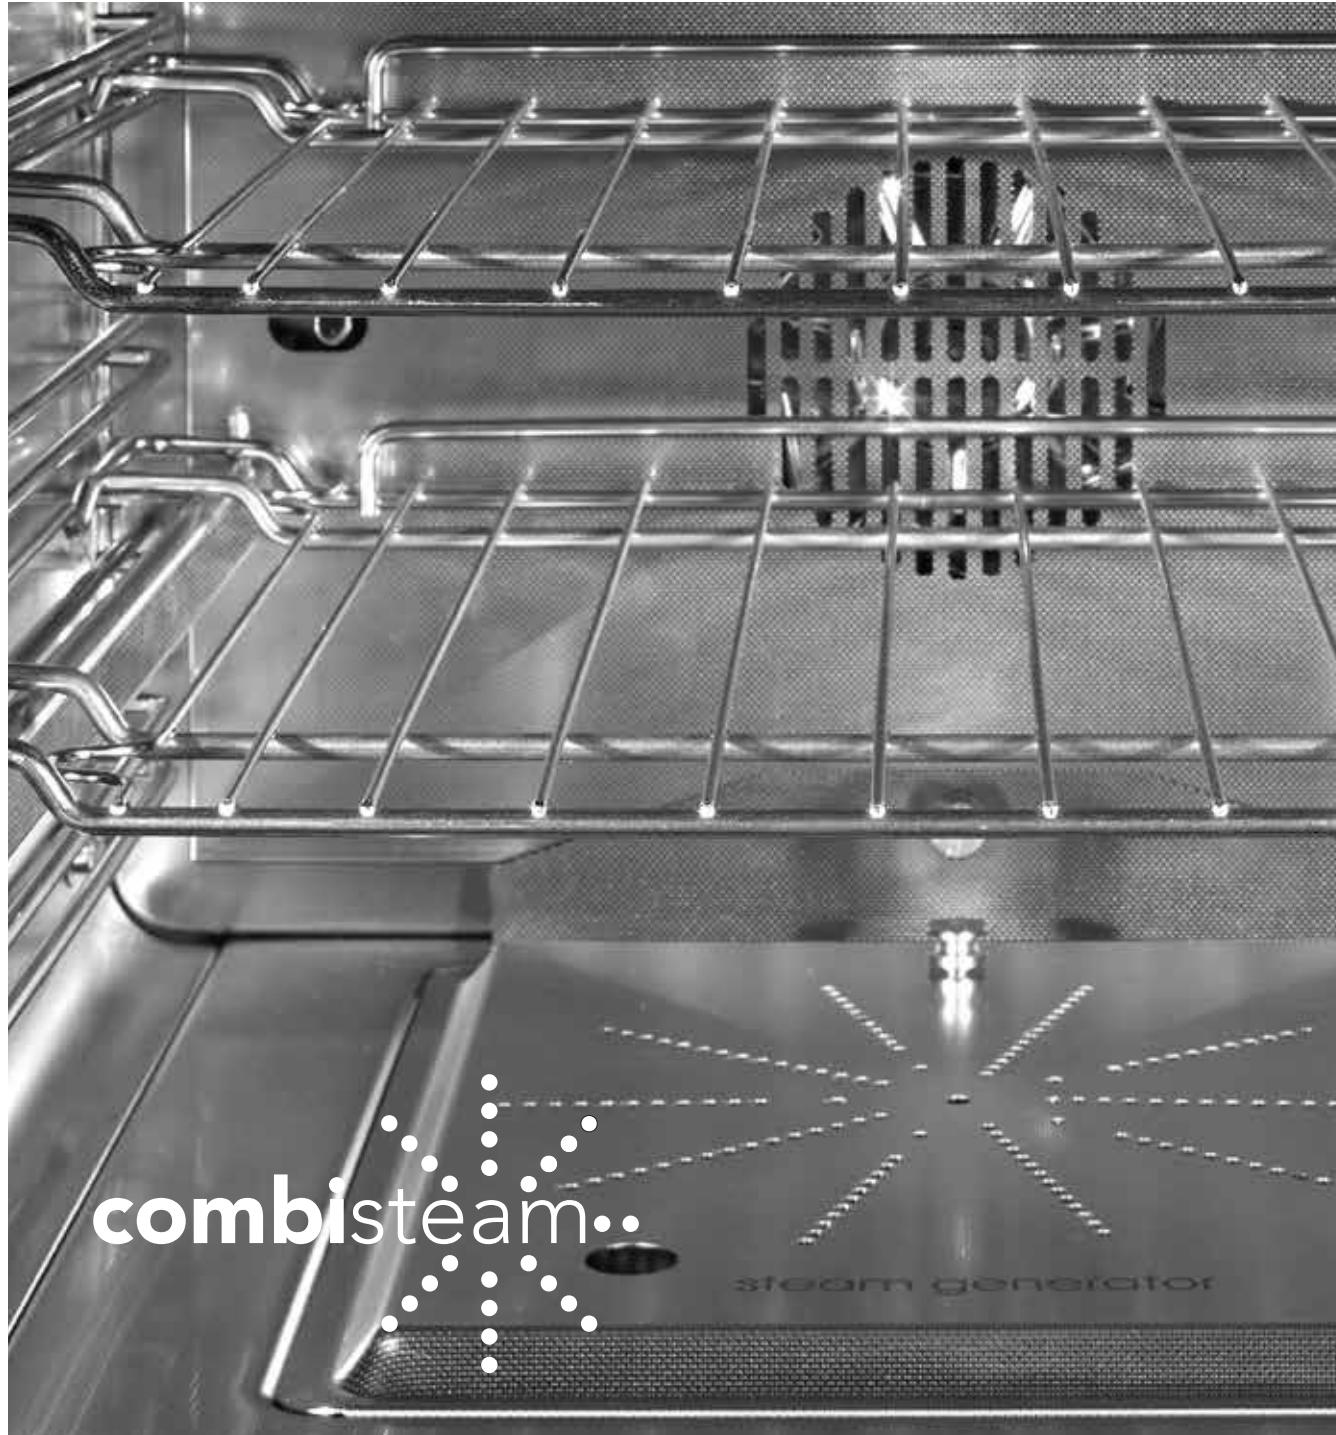

Industriebetrieb, spezialisiert in professionelle Küche und Ausführungen für Restaurant-und Hotelgewerbe. Steel auszeichnet sich heute für Ihre Herde in dem Haushaltsgerätebetrieb: dank ihrer Innovation und ihrem anspruchsvollen Design, werden die Serien Genesi Ascot und Sintesi und der Komplette Linien von Barbecuegrill der Marke Steel immer mehr geschätzt und anerkannt.

A map of Italy with a callout showing the location of Carpi, a town in the Emilia-Romagna region. The callout is highlighted in a darker shade of gray, and a blue dot marks the exact location of Carpi.

combisteam..

steam generator

The combi-steam oven by Steel, in addition to all the standard functions of traditional ovens, offers the possibility of cooking with the use of steam, or in combination with it, in order to optimize the final result enhancing the flavor of food.

La cottura a vapore è un metodo di origine orientale che permette di cuocere i cibi preservandone al meglio le caratteristiche organolettiche e nutritive; tutto ciò senza aggiunta di grassi, consentendo la preparazione di pietanze salutari e dietetiche ma al tempo stesso saporite e gradevoli al palato; il tutto in minor tempo.

La cuisson à vapeur est une méthode d'origine orientale qui permet de cuire les aliments en préservant au mieux les caractéristiques organolettiques et nutritionnelles ; tout cela sans ajouter de graisses, pour une préparation saine et diététique, mais savoureuse et agréable en même temps .

Die Dampftechnik im Backofen ist in der professionellen Küche Standard. Sie garantiert ein verbessertes Ergebnis beim Backen und Garen gegenüber den herkömmlichen Methoden des Umluftbackofens oder der Ober- und Unterhitze. Kuchen bleiben saftiger, Gemüse aromatischer. Das zeigt sich nicht allein beim Geschmack, sondern auch bei der Optik: Die Speisen bewahren ihr appetitliches Aussehen genauso wie ihren natürlichen Geschmack.

# COMBI STEAM

Steam cooking is a method of oriental origin that allows to cook food while preserving its best organoleptic and nutritional properties; all this without adding fat, allowing the preparation of healthy and dietary food but at the same time tasty and palatable; while saving time. The steam oven should not be mistakenly considered a substitute for cooking in "steamer". In the oven, temperature and humidity can be customized according to cooking directions that each food requires, while cooking in "steamer" only provides the possibility to boil at 100 ° C. Cooking in steamer, although better than

Il forno combinato - vapore Steel, oltre a tutte le funzioni standard dei forni tradizionali, offre la possibilità di cuocere con l'utilizzo del vapore, o in combinazione con esso, in modo da ottimizzare il risultato finale esaltando il sapore del cibo. Il forno a vapore non deve tuttavia essere considerato erroneamente un sostituto della cottura in pentola o in "vaporiera". Nel forno, temperatura e umidità possono essere personalizzati a seconda delle indicazioni di cottura che ogni alimento richiede, mentre la cottura in pentola offre solo la possibilità di lessare a 100°C. La cottura in vaporiera, benché migliore della semplice bollitura

Le four à fonction combinée vapeur de Steel, outre toutes les fonctions communes aux fours traditionnels, offre la possibilité de cuire avec l'aide de la vapeur, ou en combinaison avec elle, de façon à optimiser le résultat final et l'exaltation de la saveur. Toutefois ce four ne doit pas être considéré comme le substitut de la cuisson en casserole à vapeur. La température et l'humidité à l'intérieur du fours peuvent être personnalisées selon les indications de cuisson propres de chaque aliment, tandis que dans la casserole à vapeur on a uniquement la possibilité de faire bouillir à 100 ° C. La cuisson en casserole à vapeur, bien que meilleure que le bouillissement d'un point de

Als zusätzlicher Vorteil erweist sich der große Wasserbehälter, der in die Dampf-Backöfen integriert ist. Damit ist eine längere Garzeit mit Dampfunterstützung realisierbar. Bei den Steel Cucine Backöfen darf der Garprozess ruhig einmal zwei Stunden dauern - der Dampf geht dabei keineswegs aus. Zur Dampfoption kommt bei den neuen Herdvarianten von Steel Cucine noch der Edelstahlbackraum hinzu. Auch dies war bislang den Profis vorbehalten oder zeigte sich als Kostentreiber bei der Küchenanschaffung. Die einfach zu

simply boiling from a nutritional point of view, transfers further moisture to foods that can result pale and flavorless. It is necessary to identify foods whose characteristics are suitable for cooking in the oven, in the combined function or with steam. If we simply want to boil potatoes or carrots the steamer is probably the quickest and simple way. Baking with the use of hot steam should be adopted for those foods (and they are indeed many) that we wish to remain soft, tasty to the palate and tender inside but golden and / or brown at the sight.

da un punto di vista nutrizionale, trasferisce ulteriore umidità ai cibi che possono risultare sbiaditi e dal sapore "diluito". E' necessario saper individuare gli alimenti con le caratteristiche adatte alla cottura in forno, nella funzione combinata o con vapore. Se vogliamo semplicemente lessare delle patate o delle carote la vaporiera è probabilmente il metodo più veloce ed ottimale. La cottura in forno con utilizzo del vapore deve essere adottata per quei cibi (e sono davvero tanti) che desideriamo restino morbidi, gustosi al palato e teneri al loro interno ma che risultino dorati e/o rosolati all'esterno.

vue nutritionnel, transfère de l'humidité excessive aux aliments, qui peuvent faner et diluer ces derniers. Il faut bien identifier les aliments avec les caractéristiques conformes et aptes pour la cuisson en four avec la fonction combinée vapeur. Si l'on veut simplement bouillir de pommes ou de carottes, la casserole à vapeur est probablement le choix le plus approprié en vitesse et résultat. La cuisson en four avec la fonction vapeur doit être utilisée pour les nourritures (et il y en a vraiment plusieurs) qui doivent devenir souples, gourmandes, et tendres à l'intérieur, tout en demeurant rissolées et bien rôties en surface.

pfliegende Variante ist jetzt zusammen mit der Dampffunktion bei Steel Cucine zu einem hervorragenden Preis-Leistungs-Verhältnis zu bekommen. Neben der High end-Technik zeigen die Herde auch Stil. Bei den Herden von Steel Cucine ist damit Kochen Wellness pur: Mineralien, Nährstoffe und Vitamine werden nicht ausgekocht, sondern bleiben da, wo sie hingehören: im Essen. So gelingen die gewohnten Gerichte mit einem vollkommen neuen Geschmackserlebnis.

#### SPEED

Induction takes less time to cook food because the pan heats up quicker. Electromagnetic activity in the cooktop triggers electromagnetic activity in the pan, and the pan itself heats up. The pan is the starting point of the heat. Since there are fewer steps involved in heating the cookware, it takes less time for the heat to get to the food (25% to 50% less time, on average).

#### VELOCITA'

L'induzione riduce i tempi di preparazione dei cibi poiché genera calore direttamente a contatto con la padella o casseruola. L'energia elettromagnetica del piano di cottura scatena energia elettromagnetica nella padella in modo che essa si scaldi autonomamente. La padella è il punto di partenza del calore e dunque, riducendo gli step del processo di riscaldamento, esso richiede in media dal 25 al 50% di tempo in meno.

#### VITESSE

L'induction réduit le temps de préparation des aliments puisque la chaleur est générée directement au contact avec la casserole ou la poêle. L'énergie électromagnétique du plan de cuisson déclenche l'énergie électromagnétique dans la casserole de façon qu'elle se réchauffe en autonomie. La poêle est donc le point d'origine de la chaleur, en réduisant donc les passages du processus de réchauffage de 25% jusqu'à 50% en moyenne.

#### GESCHWINDIGKEIT

Induktionskochzonen übertragen Hitze über ein elektromagnetisches Feld. Töpfe und Pfannen werden somit weder durch offenes Feuer noch durch heiße Kochplatten erhitzt. Das Kochen auf Induktionskochfeldern ermöglicht kurze Ankochzeiten und eine optimierte Wärmeübertragung.

# INDUCTION COOKING

## ENERGY EFFICIENCY

A gas flame releases lots of heat around the pan, an electric burner emits radiant heat at any point where it is not in direct, firm contact with the pan. When heat is generated within the pan itself, as with induction, more of that heat gets to the food, and less of it warms up your kitchen. This means increased energy efficiency.

## EFFICIENZA ENERGETICA

Mentre la fiamma gas rilascia molto calore intorno alla padella o pirofila e i bruciatori elettrici emettono energia radiante anche nei punti non in contatto diretto con essa, il calore della cottura a induzione è generato all'interno della padella o pirofila stessa. Dunque il calore scalda solamente il cibo e non l'ambiente circostante aumentando, dunque, l'efficienza energetica.

## EFFICACITE'

Tandis que la flamme du brûleur gaz dégage beaucoup de chaleur autour de la casserole et les foyers vitro ou électrique émettent de la chaleur radiante aussi sur zones entourant et pas en contact direct , la chaleur de la cuisson induction par contre est générée à l'intérieur de la poêle même.

## WIRTSCHAFTLICHKEIT

Die kurzen Ankochzeiten und die direkte Wärme übertragung sorgen für eine ohne Wirtschaftlichkeit.

## SAFETY

No flame means no grease fires, and no gas means no gas leaks. Induction hob typically doesn't get all that hot since the heat is created in the pan itself. This means it would be less likely for the cooktop to cause a burn because the pan cools down as soon as you turn off the heat.

## SICUREZZA

Assenza di fiamme significa impossibilità di grassi che bruciano; assenza di gas significa assenza di perdite di gas. Inoltre il vetro del piano a induzione non genera calore, ma il calore è generato dalla padella o pirofila stessa al suo interno e di conseguenza, una volta spento il sistema, il vetro inizia immediatamente a raffreddarsi riducendo il rischio di ustioni.

## SECURITE'

L'absence de flamme signifie absence de gras brûlants, l'absence de gaz signifie absence de fuites de gaz. En plus, la vitro du piano à induction ne produit pas de chaleur, puisque cela se génère à l'intérieur de la casserole, par conséquent, une fois éteint le système de chauffage, la vitro se refroidit immédiatement, en réduisant le risque de brûlure.

## SICHERHEIT

Zu den zahlreichen Vorteilen der Induktionstechnologie gehört vor allem ein Plus an Sicherheit.

## CONTROL

Induction cooktops are as responsive as gas but they also have more settings. It means they allow for much more precise control of the heat for any kind of cooking.

## CONTROLLO

Il sistema di regolazione della potenza delle zone permette di controllare in modo più preciso la quantità di calore da sprigionare e di poterlo dunque adattare in modo più preciso al tipo di cottura che si intende realizzare.

## CONTRÔLE

Le système de régulation de la puissance des foyers permet de contrôler avec précision la quantité de chaleur , en l'adaptant chaque fois à la typologie de cuisson que l'on désire.

## KONTROLLE

Zu den Vorteilen der Induktion gehört eine hochpräzise Temperaturjustierung.

## CLEANING

Since an induction cooktop seldom gets very hot, food doesn't burn onto it. This means a splatter, a spill or a pasta-sauce pop calls for a quick swipe of the sponge.

## PULIZIA

Poiché la superficie non si scalda, il cibo non si brucia su di essa. Ciò implica che ogni residuo di cibo potrà essere facilmente rimosso con l'aiuto di una spugna.

## NETTOYAGE

Puisque la surface ne se réchauffe pas, les aliments ne brûlent pas sur la vitro. Cela permet d'enlever très aisément n'importe quel résidu avec l'aide d'une éponge simplement.

## REINIGUNG

Induktionskochfelder lassen sich einfach und rasch reinigen.

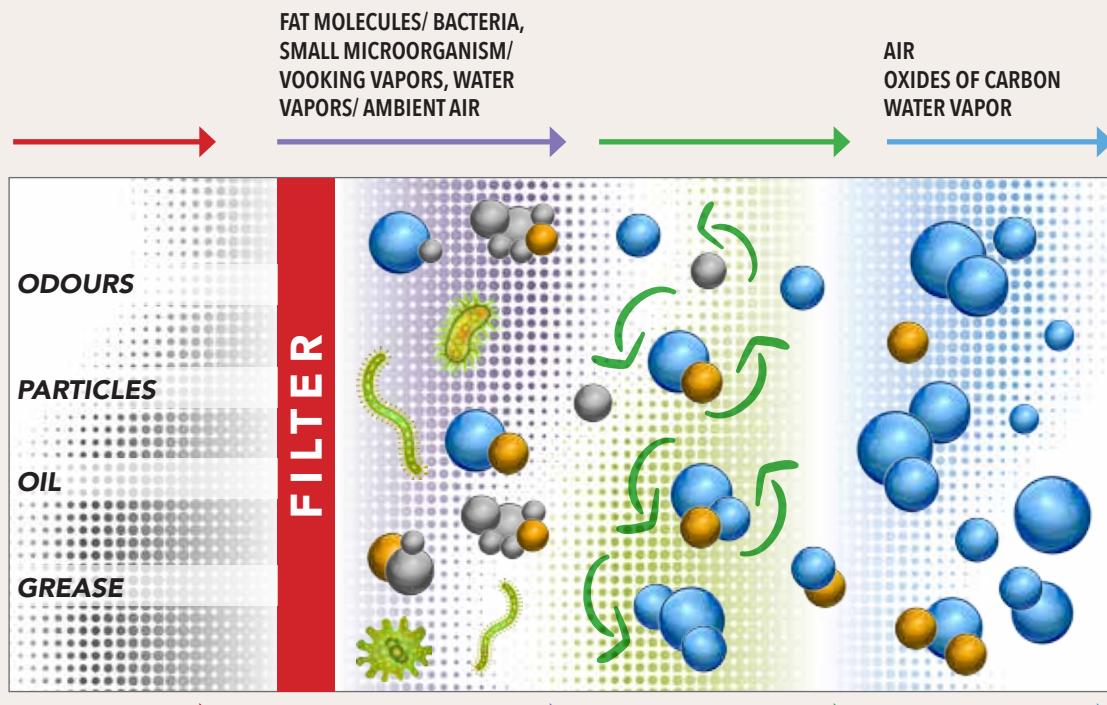

**PLASMA**  
system

GENESI ISOLA 130

# PLASMA SYSTEM

## HOW DOES PLASMA SYSTEM WORKS?

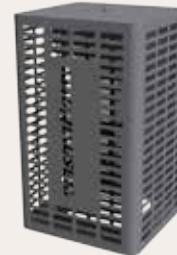

**PHASE 1:**  
In the grease filter before the motor the cooking vapors and grease are cleaned.

**PHASE 2:**  
In the high tension field with the plasma-catalyst it is started an air chemical process which destroys any impurity as well as bacteria and spores.

**PHASE 3:**  
In the catalyst the odour-molecules are additionally cleaned with extra oxidation, the filter is covered by a layer of carbon which neutralizes the ozon that is arriving.

**PHASE 4:**  
At the end of this process only clean air remains. One cooker hood with plasma filter is a serious alternative to the traditional cooker hood in suction use.

Sistema di filtraggio inserito DI SERIE su cappe Ascot Isola 120, Genesi Isola 130, Genesi verticale 90, Genesi verticale 120. Sistema di ricircolo dell'aria inducendo un notevole risparmio energetico.

Non richiede sbocchi all'esterno e permette dunque di posizionare la cucina in ogni parte della stanza.

Non richiede alcuna manutenzione, né di essere sostituito. Bassa rumorosità ed alta efficienza.

Standard equipment of Ascot Isola 120, Genesi Isola 130, Genesi verticale 90, Genesi verticale 120. Filtering/recirculating system that permits energy saving. No outside discharge needed. ## BUILT-IN GAS HOBS

### FEATURES

- / 60 - 75 - 90 cm built-in gas hobs
- / S.Steel embossed hob
- / Cast iron pan supports
- / Safety thermocouples
- / One touch ignition
  
- / Piani incasso a gas da 60 - 75 - 90 cm
- / Piano stampato in acciaio inox
- / Griglia in ghisa
- / Termocoppie di sicurezza
- / Accensione sottomanopola
  
- / Tables de cuisson à gaz intégrable de 60 - 75 - 90 cm En inox gaufré
- / Supports casseroles en fonte
- / Sécurité par thermocouple
- / Allumage automatique
  
- / 60 - 75 - 90 Gaskochfeld
- / Edelstahlkochfläche
- / Tropfräger aus Gusseisen
- / Thermoelktrische Flammenüberwachung
- / elektrische Zündung
- / Einhandbedienung

## BUILT-IN INDUCTION HOBS

### FEATURES

- / 60-80 Cm induction hobs with "free zones" technology
- / Sliding control
- / Double booster
- / Auto stop
- / 2 Pre-setted temperatures
  
- / Piani ad induzione da 60-80 cm
- / Piani incasso induzione con tecnologia "free zones"
- / Sliding control
- / Doppio booster
- / Auto stop
- / 2 Temperature pre-settate
  
- / Tables de cuisson à induction intégrables de 60-80cm
- / Commande par glissement
- / Double zones booster
- / Minuterie par zone par arrêt automatique
- / 2 Températures pré sélectionnées
  
- / 60 - 80 Cm flächeninduktion-kochfeld
- / Slider-bedienung
- / Booster
- / Sicherheitsabschaltung
- / Zweifache temperaturprogrammierung

## ISOLA 120

COLOURS Acciaio Inox Antracite

COLOURS ON DEMAND Ametista Celeste Nuvola Sabbia

### FEATURES

- / Annual consumption 153 kWh
- / 10 dimming LED lights
- / Remote control with on/off, power, light on/off/dimming, 15 minutes timer functions
- / Push-button panel
- / Stainless steel filters
- / Easy opening system for easy access to filters
- / High efficiency and low noise
- / PlasmaNorm® filtering system

- / Consumo annuo 153 kwh
- / 10 faretti led dimmerabili
- / Telecomando con funzioni on/off, regolazione potenza, regolazione luci, timer 15 minuti
- / Pannello comandi integrato
- / Filtri in acciaio inox dietro al vetro
- / Sistema di apertura easy-open per un facile accesso ai filtri
- / Alta efficienza e bassa rumorosità
- / Sistema di filtraggio PlasmaNorm®

- / Dépense annuelle d'énergie 153 kWh
- / 10 LED
- / Fonctions du télécommande: marche/arrêt/gradation, puissance d'aspiration, ventilation intermittente, poursuite du ventilateur
- / Soft touch contrôle avec display et boutons
- / Filtres inox
- / Haute efficacité
- / Système d'ouverture easy-open
- / PlasmaNorm filtre

- / Energieverbrauch pro Jahr 153 kWh
- / 10 regulierbare Led Beleuchtungen
- / Fernbedienung für Funktion an/aus, Licht dimmen, Lüfterstufe erhöhen/verringern, 15 Minuten Timer Funktion
- / Softtouch Regelung
- / einfach abnehmbare Edelstahlfettfilter
- / Höhe Leistung und Effizienz, leises Betriebsgeräusch
- / Integrierter PlasmaNorm®-Filter

# FEATURES

• MEGA WOK  
BRASS BURNERS  
MAX 6KWH

## BRASS BURNER

/ You can use extremely safe high-power burners; perfect for lovers of traditional cooking  
/ Dotati di bruciatori ad elevata potenza e sicurezza; sistema idoneo per coloro che amano la cottura tradizionale  
/ Brûleurs à puissance et sécurité élevée; système approprié pour ceux qui aiment la cuisson traditionnelle  
/ Ausstattung mit Hochsicherheits-Kochstellen- Starkbrennern, ein ideales System für alle Freunde der traditionellen Küche

• BARBECUE

## BARBECUE

/ "Grooved" and made from high-profile cast iron, it is heated by 2 independent vitroceramic hotplates. You can even use just part of the pan if you wish - perfect for lovers of griddle cooking  
 / Elemento "rigato" in ghisa di elevato spessore, riscaldato da 2 piastre in vetroceramica indipendenti, che ne consentono un uso anche solo parziale  
 / Élément "strié" en fonte grande épaisseur, chauffé par 2 plaques en vitrocéramique indépendantes, qui en permettent une utilisation même partielle; pour les amateurs de cuisson à la plaque  
 / "Gerilltes", extrastarkes Element aus Gusseisen, erhitzt durch 2 unabhängige Glaskeramikplatten, die auch einen nur partiellen Gebrauch zulassen, für die Freunde der Grillplatte

• LAVA STONE GRILL

## LAVA STONE GRILL

/ Its electrical element is on lavastone, with a stainless steel tray; for lovers of barbecue cooking  
 / Elemento di cottura con resistenza elettrica immersa in pietra lavica, con bacinella di contenimento inox; per gli amanti della cottura "barbecue"  
 / Élément de cuisson à résistance électrique plongée dans une pierre volcanique, avec bac de réception en inox; pour les amateurs de cuisson "barbecue"  
 / Koch-Element mit einem in Lavastein eingelassenen elektrischen Widerstand, Inox-Aufnahmeschale, für die Freunde des "Barbecue"-Grills

# FEATURES

• FRYTOP

FRYTOP

/ "Smooth" and made from high-profile cast iron, it is heated by 2 independent vitroceramic hotplates. You can even use just part of the pan if you wish - perfect for cooking with a veil of oil

/ Elemento "liscio" in ghisa di elevato spessore, riscaldato da 2 piastre in vetroceramica indipendenti, che ne consentono un uso anche solo parziale; per una cottura in velo d'olio o alla piastra

/ Élément "lisse" en fonte grande épaisseur, chauffé par 2 plaques en vitrocéramique indépendantes, qui en permettent une utilisation même partielle; pour les amateurs à l'huile ou à la plaque

/ "Glattes", extrastarkes Element aus Gusseisen, erhitzt durch 2 unabhängige Glaskeramikplatten, die auch einen nur partiellen Gebrauch zulassen, zum Garen in etwas Öl oder als Grillplatte

• FRYER

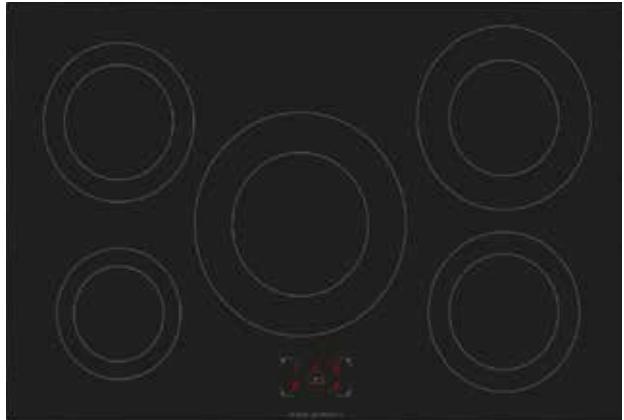

FRYER

/ The pan can be removed completely for quick and easy maintenance; the rack has a hook for dripping, while the stainless steel lid also comes as standard. Double safety valve. Specifically for delicate and crispy frying.

/ La vasca è a totale estrazione per una manutenzione semplice e veloce; il cestello è dotato di gancio per lo sgocciolamento, mentre anche il coperchio in acciaio inox è di dotazione standard; doppia sicurezza; questo elemento è specifico per frittature delicate e croccanti.

/ La cuve est à extraction totale pour permettre un entretien simple et rapide; le panier est doté d'un crochet pour l'égouttement, le couvercle en acier inox est fourni de série; double sécurité; cet élément est spécifique pour les fritures délicates ou croquantes

/ Die Wanne lässt sich für eine einfache und schnelle Pflege vollständig ausziehen. Der Korb ist mit Haken zum Abtropfen versehen, auch der Deckel aus Inox- Stahl gehört zur Standardausstattung. Zweifache Sicherheit: Dieses Element ist speziell für feine und knusprige Fritten ausgelegt

### INDUCTION

/ Induction hob with 5+1 elements and booster function  
/ Piano di cottura ad induzione a 5+1 zone con funzione booster  
/ Plaques à induction avec 5+1 zones et fonctionnement booster  
/ Induktions-Kochfeld mit 5+1 Bereichen und Booster Funktion

# OPTIONAL ACCESSORIES

A close-up, high-angle shot of a black leather strap with a prominent woven pattern. A gold-toned circular buckle is attached to the strap. In the center of the buckle, a small gold coin is visible, showing some intricate designs. The lighting is dramatic, highlighting the texture of the leather and the metallic sheen of the buckle and coin.
